

**Declaration of conformity:  
Per- and polyfluoroalkyl substance (PFAS)**

Dear valued customer,

per- and polyfluoroalkyl substances (PFAS) form a large group of synthetic chemicals and are characterised by their grease- and water-repellent properties. These substances are only degraded very slowly in nature and are suspected of being harmful to health.

We hereby confirm that, based on our current knowledge, none of the products supplied by THERMOTEX NAGEL GmbH contain any substances from the PFAS group or are intentionally or unintentionally added during manufacture. We also refer to information from our raw material suppliers and our various OEKO-TEX certificates. In accordance with OEKO-TEX regulations, the use of PFAS has been prohibited since 1 January 2025.

This declaration has been created to the best of THERMOTEX NAGEL GmbH's knowledge and belief, is for guidance only and is not to be understood as a guarantee or quality specification. Should you require further information, please contact the undersigned.
